

Greetings crew,

It is time for your orientation brief. We are sure that you are very anxious about your upcoming mission and want to help prepare you for the types of challenges you may encounter. Unfortunately, traveling through space is difficult and full of unknown dangers.

We hope all of your physicals prove you to be an outstanding candidate for the journey ahead.

This brief consists of three parts to get you oriented orienteering. Attached you'll find a star chart used by our earliest space pioneers, a mathematical diagram, and a poem in hr/deg/# format.

Good luck and as always, google is an exceptional resource. Never give up.

Very Respectfully,

Brandon Hufstetler  
Mission Director  
SEARCH

P.S. You'll find the answer you seek is an Icy Elk Star.

**A poem to carry you through the constellations**

[Enter EGEUS, HERMIA, LYSANDER, and DEMETRIUS]  
-Stand forth, Lysander: and my gracious duke  
#1

The pale companion is not for our pomp  
-If I refuse to wed Demetrius  
#4

But I will wed thee in another key  
I beg the ancient privilege of Athens  
#5

Like to a step-dame or a dowager  
-One that composed your beauties, yea, and one  
#4

Hippolyta, I woo'd thee with my sword  
-Full of vexation come I, with complaint  
#1 or #3

This old moon wanes! she lingers my desires  
As she is mine, I may dispose of her  
#2 or #7

Four nights will quickly dream away the time  
Immediately provided in that case  
#4

Go, Philostrate  
-And then the moon, like to a silver bow  
#4

Long withering out a young man revenue  
-The pale companion is not for our pomp.  
#2 or #4
